Restaurant Ordering

Accepting clients

A full front-of-house team in one AI — QR ordering, reservations, POS sync, and payments.

In plain terms: Karim is like a waiter, host, and cashier combined — guests scan a QR code at the table and Karim takes the order, sends the bill, and books tables. No app for your guests to download.

WHAT KARIM DOES

- Takes orders at the table via a simple QR code.
- Manages reservations and the waitlist.
- Sends every order straight to your Foodics POS.
- Sends secure payment links (cards, wallets).
- Suggests add-ons and drinks to grow each check.
- Updates the menu and hides sold-out items instantly.

- ✗ Chasing reservation confirmations by phone.
- ✓ Karim confirms, reminds, and refills no-show tables automatically over WhatsApp.

- ✗ Re-typing every ticket into your POS by hand.

- ✓ Karim upsells on every ticket and takes card/wallet payment (Paymob/Fawry) from the phone.
